

DEKK ASV Skid Steer Rubber Tracks have been designed and manufactured with a high level of engineering and precision to ensure they withstand the rigours of earthmoving and construction applications.

The core features and benefits that make DEKK ASV Skid Steer Rubber Tracks more superior to all other tracks on the market are:

- 1 COMPREHENSIVE RANGE OF RUBBER TRACKS**
to suit leading OEM brands including ASV, Terex & CAT
- 2 NON-STEEL KEVLAR BELT CORE**
for greater durability and reduced stretching
- 3 TREAD PATTERNS DESIGNED FOR IMPROVED TRACTION**
reducing surface damage and negative impact on the environment
- 4 ONE PIECE MOLDING OF DRIVE LUGS TO TRACK**
eliminating breakage and providing maximum strength for superior performance and extended track life
- 5 HEAVY DUTY RUBBER COMPOUND**
provides greater flexibility & wear resistance and minimises punctures & tears. Results in reduced maintenance & downtime and extended track life
- 6 REDUCED VIBRATION AND WEIGHT**
resulting in improved operator comfort and reduced noise & fuel consumption

TECHNICAL SPECIFICATIONS

Track Width	Pitch	Rubber Compound	Steel Cable/ Core Bar	Track Life	Warranty	Suit OEM Brands
280mm to 510mm	4"	Heavy Duty Natural & Synthetic Fibre Virgin Rubber	Kevlar Non-Metal Core	1 to 2yrs*	12mths	ASV, Terex and CAT

* Based on normal operating conditions of the equipment.
