

DEKK Non-Marking Rubber Tracks have been designed and manufactured with a high level of engineering and precision and are guaranteed to fit various models of Cherry pickers, Tracked Access and Aerial machines. They have been designed specifically for use on surfaces such as indoor, parquetry, polished and other industrial floors, eliminating tread marks and surface damage.

1 REDUCED VIBRATION

resulting in improved operator comfort, reduced noise and minimised wear & tear on the machine

2 PRECISION FITTED STEEL CORE BARS

for maximum strength and reduced risk of detracking

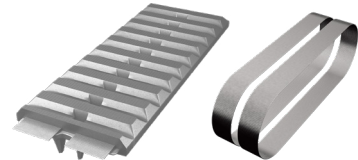

3 NON-MARKING RUBBER COMPOUND

a different type of chemical and rubber composition is used to produce a white coloured non-marking track

4 CONTINUOUSLY WOUND HIGH TENSILE STEEL CABLES

prevents corrosion, provides greater strength and durability and eliminates weak points caused by joints found in spiral wound cables

5 COMPREHENSIVE RANGE OF RUBBER TRACKS

to suit leading OEM brands including Hitachi, Hinowa, JLG, Bluelift, etc.

6 TREAD PATTERNS

Available in various tread patterns to suit the machine and application.

WHITE NON-MARKING TRACK

TECHNICAL SPECIFICATIONS
