

DEKK Crawler Carrier Rubber Tracks have been designed and manufactured with a high level of engineering and precision to ensure they withstand the rigours of earthmoving and construction applications.

The core features and benefits that make DEKK Crawler Carrier Rubber Tracks more superior to all other tracks on the market are:

**4 CONTINUOUSLY WOUND HIGH TENSILE STEEL CABLES**

prevents corrosion, provides greater strength and durability and eliminates weak points caused by joints found in spiral wound cables

**1 HEAVY DUTY RUBBER COMPOUND**

provides greater flexibility & wear resistance and minimises punctures & tears, resulting in reduced maintenance & downtime and extended track life

**2 COMPREHENSIVE RANGE OF RUBBER TRACKS**

to suit leading OEM brands including Morooka, CAT, Yanmar & Komatsu

**3 REDUCED VIBRATION**

resulting in improved operator comfort and reduced noise

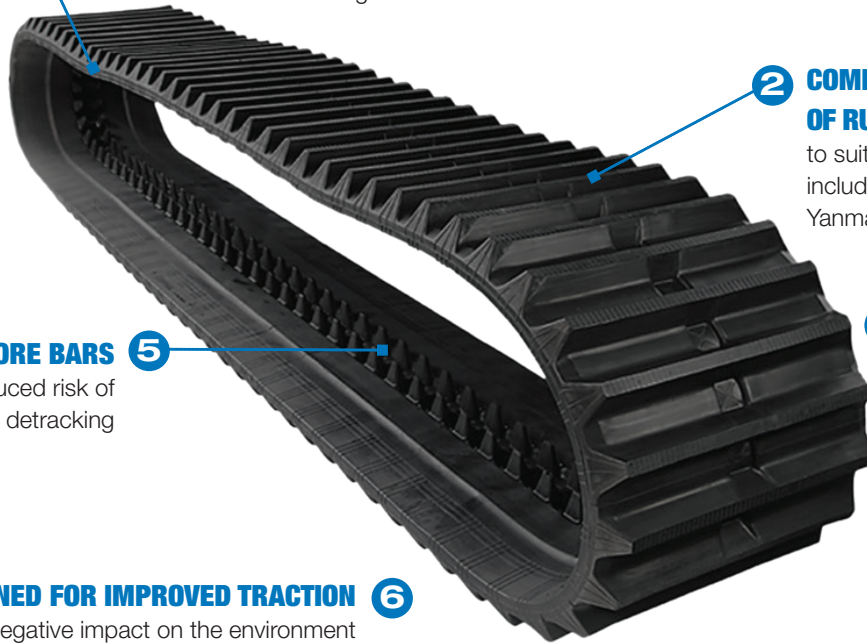

**5 PRECISION FITTED STEEL CORE BARS**

for maximum strength and reduced risk of detracking

**6 TREAD PATTERNS DESIGNED FOR IMPROVED TRACTION**

reducing surface damage and negative impact on the environment

### TECHNICAL SPECIFICATIONS

Track Width	Pitch	Core Bar	Rubber Compound	Steel Cable	Track Life	Warranty	Suit OEM Brands
320mm to 1000mm	72mm to 150mm	Steel	Heavy Duty Natural & Synthetic Fibre Virgin Rubber	Continuously Wound, High Tensile	1 to 2yrs*	12mths	Morooka, CAT, Yanmar, Komatsu and others.

\* Based on normal operating conditions of the equipment.

**24 MONTH  
FULL REPLACEMENT  
WARRANTY  
ON ALL EXCAVATOR TRACKS**

DEKK are so confident that their Excavator Rubber Tracks will outlast and outperform the competition that they have introduced the industry first and only 24-month Full Replacement Warranty on all DEKK Excavator Rubber Tracks.

**1300 335 528**
